- Mongoose ODM
- Apollo GraphQL
- MERN Stack

Projects

Weather Dashboard | <https://github.com/BrettSantor/weather-dashboard-app> | <https://brettsantor.github.io/weather-dashboard-app/>

- This web application was made with HTML, CSS, and JavaScript along with the use of a 3rd party API called OpenWeatherMap
- The Weather Dashboard lets you search cities' weather and displays the 5 day forecast. It also saves your searches to local storage so that you can search for previously searched cities with the click of a button

-
- I designed this applications style as well as created the logic it needs to function

Team Profile Generator |

<https://github.com/BrettSantor/Team-Profile-Generator>

- This web application was made with HTML, CSS and JavaScript
- This tool was created to practice Test Driven Development
- I designed the tests and logic used to generate the HTML for this tool

Howler | <https://github.com/BrettSantor/Howler> | <https://howler.herokuapp.com>

- This web application was made with the MERN stack
- Howler is a social media platform for dog owner who want to find playdates for their dogs
- This is a group project from bootcamp and I was involved in the conception, creating the dashboard, adding photo functionality and styling
